HOW TO ESTIMATE WHAT AN IKEA KITCHEN WILL REALLY COST YOU

ACCURATE LINEAR FEET PRICING FOR IKEA KITCHENS, BY DOOR STYLE

Applicable only in the United States.
Please speak with IKEA to confirm all prices, offers, and store policies.

IKD’S KITCHEN DESIGN SERVICES ARE NOT ENDORSED BY, AFFILIATED WITH OR SPONSORED BY INTER-IKEA SYSTEMS B.V. IKEA IS A REGISTERED TRADEMARK OWNED BY INTER-IKEA SYSTEMS B.V.
What’s the first thing a homeowner wants to know about remodeling their kitchen?

**How much it’s going to cost them!** IKEA is the only major retailer to readily offer a price for each and every door style.

IKEA also offers a swift quote, by door style, for a 10’ x 10’ “standard” kitchen measurement. These prices are deeply flawed, however, because there’s really **no such thing** as a standard kitchen layout

Even if a standard kitchen design *did* exist, it wouldn’t matter because your kitchen design will be completely different.

(IKEA isn’t the only one guilty of this. Many retailers and cabinet manufacturers use these 10’ x 10’ standard kitchen measurements, too. Why? It’s easier to do that than take the initiative to crunch all the numbers to find out the real-life linear feet pricing of their kitchens.)

This is a shame because IKEA is missing an opportunity to help their customers accurately estimate the cost of a new kitchen.

Luckily, IKD has done the legwork for IKEA kitchen customers. We’ve crunched the numbers and we can help you calculate a more accurate estimate of the cost of a getting a new IKEA kitchen.
EVERY KITCHEN IS UNIQUE AND THEREFORE, YOUR KITCHEN MEASUREMENTS ARE UNIQUE.

If you want to get a quick and approximate idea of what your IKEA kitchen cabinets will cost, then you will need **accurate linear foot pricing** – not abstract 10’ x 10’ standard kitchen pricing models that will most likely not fit into your kitchen.
HOW DID IKD CALCULATE SUCH ACCURATE LINEAR FEET PRICING FOR IKEA KITCHEN DESIGNS?

IKD has professionally designed thousands of IKEA kitchens for North American homeowners and has determined precise linear feet pricing using the following criteria:

- 125 designs were randomly selected for each unique door style\(^1\).
- A total of 2,125 designs were averaged (17 door styles x 125 designs per style).
- Not a single one happened to be a 10’ x 10’ kitchen with IKEA’s standard layout.
- Designs were selected from 2016, therefore these layouts are current.
- Of the 125 designs per style, the five most and least expensive designs were eliminated from the sampling for a better statistical average.
- Islands and peninsulas were included.
- Measurements were taken from corner to corner, covering the kitchen from top to bottom.
- The price used in the average includes wall, base and tall cabinets.
- Knobs and handles were not included.

\(^1\) *IKD always strive to be up-to-date; however, as we are not affiliated with IKEA, there can be times during the year when IKEA releases products and updates that take time for us to familiarize ourselves with.*
LINEAR FEET PRICING FOR IKEA KITCHENS, BY DOOR STYLE

We’ve listed the door styles\(^2\) from lowest to highest cost per linear foot.

All prices are in USD.

</tbody>
</table>

\(^2\) Accent doors like the KALVIA, FLÄDIE, and JUTIS are not included because they only come in limited sizes and cannot be used for an entire kitchen design.
WHEN I USE IKD’S PRICES, MY 10’ X 10’ KITCHEN COST SO MUCH MORE THAN IKEA SAYS IT WILL! WHY?

None of the kitchens that we averaged were a 10’ x 10’ standard kitchen size! Real-life kitchens cost more.

Our actual customer designs included storage accessories, moldings, glass doors, wall, tall and base cabinets and countless other different layouts. IKD really covers your bases.
IF IKEA SHOWS AN EQUAL LINEAR FEET PRICE FOR SEVERAL DOOR STYLES, THEN WHY ARE IKD LINEAR FEET PRICES DIFFERENT FOR EACH DOOR STYLE?

IKD’s linear feet prices take into account the realities of real kitchens. The standard IKEA prices are often not realistic.

- **Some kitchens are designed with accent doors.** Combining door styles does change a “standard” price.

- **IKD’s one-on-one personalized designs provide countless “extra” items that IKEA does not provide:** multi-sized cabinets, moldings, glass doors, as well as a variety of different and innovative layout plans.

- **Typically, islands and peninsulas include additional panels, doors and trims.** These have also been taken into consideration for the total prices used in the linear feet average for each door style.
HOW TO CALCULATE THE LINEAR FEET OF IKEA CABINETS FOR YOUR NEW KITCHEN

Now that you understand IKD’s linear feet prices and how they are determined, you’ll need to know how to roughly calculate the linear feet of cabinets for your new kitchen:

1. Measure the entire wall where cabinets are to be designed and determine the total amount of inches.

2. Subtract the door openings, as well as all appliances mounted on the floor from the total linear inches. (Average widths: door: 36”, refrigerator: 36”, range: 30”).

3. Divide the remaining total by 12 to convert from linear inches to linear feet.

4. Multiply the amount of linear feet by the amount in dollars (US$) for your selected door style from the chart above to get an approximate total cost of IKEA cabinets for your remodeled kitchen.

Example: 22 linear feet of Bodbyn off-white doors ($198.11 per linear foot) will be 22x198.11 = $4,358.42
Using these steps will help you understand just how far you can go with your budget.

You will also save a tremendous amount of time, energy, and money by understanding that most standard kitchen layouts are not 10’ by 10’.

This is where IKEA steps out and our professional designers at IKD step up for the homeowner who wants an efficiently designed kitchen.
A BEAUTIFUL, STYLISH KITCHEN FOR YOUR HOME STARTS HERE

IKD are kitchen designers who know how to turn IKEA into affordable luxury for your home. We’ve created thousands of IKEA kitchen designs - and no 2 are alike!

“UN. BELIEVEABLE.”

“Words won’t describe the services, or rather, hands on, personal attention from IKD. At least that was our experience.

I simply took measurements, photos, shot them over to our designer, and then we worked TOGETHER (keyword...partnership) on the design. I gave IKD a lot of freedom, because I had a sense I could trust their input.

The design was on point, better than I expected, and provided us the kitchen we didn’t even dream of.”

IKD Customer Bryan
